

Allied Health 2

Meets M-F 7:30-8:50am
Dual Credit Course

Course Description

Students learn administration skills related to healthcare, including Medical Terminology and Medical Management. Focuses of Allied Health 2 include developing oral and written skills using terminology common in health care professions. It will also prepare students to different management positions in Health Information, from medical ethics, coding and information technology, to statistics, management and medical reimbursement.

Skills Acquired:

- Define medical word parts and terms related to each system of the body.
- Define terms used in pharmacology.
- Apply the 5 basic steps of ethical decision-making in Health Information Management.
